	McLaughlin's Berley & Oils	101 - 103

MOVE FORWARD

It's what we've done each and every day here at St. Croix rods for the last 75 years in our unrelenting quest to give the anglers the upper hand. A lot happens during any given day in our St. Croix North & South factories. We take the best moments of discovery, learn from the rest, and move forward to the next day where the materials, technologies and processes may change but the goal remains the same: improving the angling experience. We are proud of our 75 years in business and the control we command over our rod-manufacturing process handcrafting the Best Rods on the Earth® right here in North America.

We are proud that we have been owned by the same family for the last 45 of those years. Above all though, we're grateful to our anglers for the trust and confidence you've placed in us to add value to your experience on the water. That's what drives us every day, because at St. Croix Rods, your passions are our passions..... *and we're just getting started!*

St. Croix Exclusive Technologies

Advanced Reinforcing Technology™ (ART™)

Exotic Carbon Fiber material prevents ovaling and adds 10X strength without increasing blank diameter or weight. ART® significantly improves the hoop strength of the blank, preventing it from deforming under load.

TAPER ENHANCEMENT TECHNOLOGY

Precision cut, curved blank patterns create rods with better actions and improved sensitivity

FORTIFIED RESIN SYSTEM

Advanced super-resin and blank curing system prevents micro buckling by keeping the fibres in proper alignment, providing a 33% increase in strength vs std. resins.

Integrated Poly Curve® Technology (IPC®)

Eliminates all the transitional points in the rod blank, providing smoother actions, increased strength and greater sensitivity. IPC® Blanks have a more uniform wall thickness from Tip to Butt.

VEIL TECHNOLOGY

A tri-bread blend of Carbon Fibre, Fibreglass, and explicit resins combined to exponentially reduce the effects of exterior impacts on the blank integrities.

TRIGON GRIP SYSTEM

The Trigon Grip System is designed to ergonomically fit the hand with pure precision. Trigon grips have amazing support, comfort and feel.

HANDCRAFTED BY ST.CROIX
Made to the highest standards in our state of the art factory in Fresnillo, Mexico. Overseen directly by St. Croix staff. THE BEST RODS ON EARTH®

100% AMERICAN MADE
Made to the highest standards since 1946 in Park Falls, Wisconsin, U.S.A. Our mission is to build THE BEST RODS ON EARTH®

5 YEAR WARRANTY
The Silver Standard in Rod Warranties. We value our Customers and seek to reward that trust by providing the best support in the industry

15 YEAR WARRANTY
The Gold Standard in Rod Warranties. We value our Customers and seek to reward that trust by providing the best support in the industry

U.S.A. MADE HOODIE

Features:

8 oz. 50% cotton, 50% polyester
Double-needle coverseaming on neck, armholes and waistband.
Seamless body with set-in sleeves; virtually pill-free
1x1 ribbed cuffs and waistband
Concealed seam on cuffs
Pouch pocket; double-ply hood with grommets and matching drawcord

Available in Sizes:

Med, Lge, X-Lge & XX-Lge

QUEST PERFORMANCE L/S HOODIE

Features:

Made of 90% polyester
10% spandex
Technical features includes
UPF 50+
Side Mesh Panels
Stain Resistant
Moisture Wicking
Anti-microbial performance fabric

Available in Sizes:

Med, Lge, X-Lge, XX-Lge & XXX-Lge

VENTURE PERFORMANCE L/S

Features:

Made of 90% polyester
10% spandex
Technical features includes
UPF 50+
Side Mesh Panels
Stain Resistant
Moisture Wicking
Anti-microbial performance fabric

Available in Sizes:

Med, Lge & X-Lge

BLACKICE SCARF

Features:

Knit Acrylic Scarf with Fringe
St. Croix Rod logo features each side

EVERYDAY POLO SHIRT

Features:

5 oz., 100% polyester face plaited to 60% polyester, 40% cotton back.
Matching flat-knit collar
Luxury, comfort and performance in one.
Available in Sizes:
Med, Lge, X-Lge, XX-Lge & XXX-Lge

BEST RODS EXPRESSO TEE

Features:

60% combed ring spun cotton & 40% polyester jersey
4.3 oz.
32 singles
Slightly heathered
Available in Sizes:
Med, Lge, X-Lge, XX-Lge & XXX-Lge

CAP EVERYDAY

Khaki Chino Twill fabric with a low profile structured front fit.
Finished with a back brass metal slide.

Adjustable. One size fits all

CAP NORTHBOUND

Full charcoal low profile cap with a curved structured front fit.
Finished with a Velcro closure.

Adjustable. One size fits all

CAP TROLLING

This low profile, black chino hat is perfect for every occasion.
Featuring the St. Croix logo on the front and an adjustable Velcro enclosure.

Adjustable. One Size fits all.

5" AMERICAN MADE DECAL

Become a part of the St. Croix Rod family

12" CARPET DECAL

This 12" Best Rods on Earth Carpet Decal is perfect for your Boat or Kayak.

- “UNCONDITIONAL” 15 or 5 YEAR INTERNATIONAL WARRANTY -

- see our website at www.jurofishing.com for full details -

BATTLE ROYALE

The Battle Royale is our 5'2" flagship model featuring **Fuji® PLS/PSS Reel Seats**, **Fuji®MNSG/KLSG Guides** and custom componentry to create a stealthy modern classic with eye popping **Chameleon paintwork** and custom cosmetics. The high quality **Toray® Graphite blank** also features **Nano technology** which effectively improves blank strength and resilience. As the name suggests - here is your weapon of choice when taking on reef thugs or deep water doozers. The Battle Royale is very competitively priced and comparable to the very best rods on the International market.

'TORAY'

MODEL	STYLE	LENGTH	PE RATING	JIG RANGE	PIECES
BATTLE ROYALE ML	SPIN	5'2"	PE 3 - 6	150 - 400 grams	1
BATTLE ROYALE MH	SPIN	5'2"	PE 4 - 8	200 - 500 grams	1
BATTLE ROYALE ML	OVERHEAD	5'2"	PE 3 - 6	150 - 400 grams	1
BATTLE ROYALE MH	OVERHEAD	5'2"	PE 4 - 8	200 - 500 grams	1

The Phantom is a 5'7" rod with great butt power and a light, fast tip. The requirements for the Phantom was to develop an exceptional rod for jigging for Dogtooth Tuna as well as a rod to double down as an outstanding live or dead bait rod for many species. The tip not only works lighter jigs but transmits those pre-bite panic vibrations from live baits early enough to prepare the angler for the impending chaos. The longer rod length allows easier maneuvering around duckboards or outboard obstacles.

The Phantom has been 3 years in the making. It has involved hardcore Dogtooth Tuna sessions as well as multiple trips to the 3 Kings with different jiggers until we were happy with it's design. The blank uses High Performance Graphite from Toray® of Japan with advanced Nano technology. The Phantom rod features our standard specifications including **Fuji® PSS/DPS Reel Seats** with the latest **Fuji® K Frame SIC Guides** and custom componentry. The Overhead model also features the innovative "ACID" or "SPIRAL" design.

'TORAY'

MODEL	STYLE	LENGTH	PE RATING	JIG RANGE	PIECES
PHANTOM SPIN	SPIN	5'7"	PE 4 - 8	150 - 500 grams	1
PHANTOM OVERHEAD	ACID WRAP	5'7"	PE 4 - 8	150 - 500 grams	1

TWISTED SISTA

The Twisted Sista rod is an innovative "ACID" or "SPIRAL" design which draws on the inherent advantages of both Overhead and Spin rods. The design alleviates damaging blank twist associated with poorly built Overhead rods and allows the blank to develop its maximum power potential and design characteristics. These rods have remarkable power and resilience as a result of its carefully tapered Nano blank with a perfect acid guide flow. Bend the Twisted Sista to its Max and all will become evident. This rod uses **Fuji® PLS palming reel seats** with **Fuji® KWAG & LC Guides**. The MK-II rod has been redesigned with slightly more butt power and finished in an eye popping **Chameleon Brown/Red paint** with custom artwork and detail.

'TORAY'

MODEL	STYLE	LENGTH	PE RATING	JIG RANGE	PIECES
TWISTED SISTA L	OVERHEAD	5'	PE 2 - 5	100 - 300 grams	1
TWISTED SISTA ML	OVERHEAD	5'	PE 3 - 6	150 - 400 grams	1
TWISTED SISTA MH	OVERHEAD	5'	PE 4 - 8	200 - 500 grams	1

NINJA

The blank uses High Performance Graphite from Toray® of Japan with advanced Nano technology. The increased length offers a longer butt length and longer reach than before yet still saves weight making Jig Star rods easy to fish all day, every day.

The Ninja Overhead rod features our standard specifications including **Fuji® PSS/PLS Reel Seats** with the latest **ALPS® SSMNZG Guides** whilst the Threadline features **Fuji® K Frame Alconite Guides** and custom componentry. To avoid "Dead Spots" caused by excessive binding, all Jig Star rods are bound on the Guide feet and nothing between. This feature maintains the Blanks natural curve and sensitivity.

All Jig Star rods are complete with a distinctively **embroidered rod bag**.

'TORAY'

Slow JERK

SLOW PITCH jigging is one of the newest and fastest growing lure fishing methods to hit these shores.

Micro Jigging is using Jigs that flutter and slide, using lighter braids requiring ultra light jigging rods to suit more finesse forms of fishing. Slow Jerks have more butt strength as models increase to heavier versions.

The Slow Jerk Rods are also suited to Snapper and Bottom/Reef fishing.

The Slow Jerk rods feature high quality Toray® Graphite Blanks, Fuji® TCS Reel Seats, Fuji® 'K' Frame Alconite Guides and custom componentry. The 1pc models feature a traditional guide train and are Blue in colour.

The 2pc models all feature the "ACID" or "SPIRAL" wrap design and are RED in colour.

All Jig Star rods are complete with a distinctively embroidered red bag.

TORAY

MODEL	STYLE	LENGTH	PE RATING	JIG RANGE	PIECES
SLOW JERK 603 - 2	OVERHEAD	6'3"	PE 0.8 - 1.5	Max 120 grams	1

SLOW JERK 603 - 6A	ACID WRAP	6'3"	PE 5	Max 600 grams	2

TAI KABURA

The latest Japanese technique to target Snapper is with the use of sliding Kabura jigs that are fished similar to Inchiku jigs.

The Tai Kabura rod is designed to fish mainly Kabura but will equally handle Inchiku, Micro and Slow Pitch jigs.

The blank uses a new revolutionary graphite material called GRAPHENE.

This results in a much lighter, stronger and more responsive fishing rod.

The Tai Kabura rods feature an exposed Fuji® SK reel seat that allows for better bite detection and feel.

It also features Fuji® 'K' Frame Alconite guides with minimal thread not to take away from the natural action of the rod.

The Tai Kabura Overhead model features the innovative "ACID" or "SPIRAL" design which draws on the inherent advantages of both Overhead and Spin rods. These rods are very versatile and can also be used for fishing Soft Plastics.

TORAY

MODEL	STYLE	LENGTH	PE RATING	JIG RANGE	PIECES
TAI KABURA SPIN	SPIN	6'3"	PE 1 - 2	Max 150 grams	2
TAI KABURA OVERHEAD	ACID WRAP	6'3"	PE 1 - 2	Max 150 grams	2

**DESIGN, INNOVATION and UNDENIABLE PERFORMANCE
in OFFSHORE LURES !!!**

HOOKMAG® TECHNOLOGY

Patented **HookMag™** technology that keeps the front hook in the stinger position at any speed until a Wahoo or other strike occurs.

The hook is then released and direct swivel connection to hook and mouth of fish. Please check out the videos on our YouTube, Facebook or Instagram pages for a better understanding of the concept.

The **HookMag™** advantage of releasably retaining the belly hook in the highly effective stinger position increasing hook ups, also means no more hassle and tangle, no more belly hooks stuck over the back of the lure, and no more interference with the lure body.

- 10" Dynamic Body
- 360grams (12.8oz)
- HookMag™ Technology
- Speed up to 20 knots

The MagDiver™ 10" is our innovative and unique award winning High Speed Trolling Lure. Truly a new breed of Wahoo, Tuna and Big Game Lures. The MagDiver™ 10" features a patented design that allows the lure to swim straight and below the surface at speeds of up to 20 knots, or within short aggressive turns directly inside or outside the propwash. The MagDiver™ 10" lure also incorporates the patented **HookMag™** system

- All lures are 'KEEL WEIGHTED' for perfect balance and trolling action everytime!
- Near Indestructible Hard Resin Heads

The Mogul 9" is a deep running heavy cup faced jetted skirted lure of the highest quality. The Mogul 9" offers a cup faced front with 4 jet holes in the head to help create an amazing bubble trail as this lure trolls through the water. These lures can be used in most sea conditions and position behind the boat.

11.5" Overall 9" Skirt 165grams Deep Running Heavy Jet Head

RAINMAKER 8"

NEW

4 jet holes in head
Increase bubble trail

Glow in the Dark
Fish Scale Head

The Rainmaker 8" is a deep running heavy cup faced jetted skirted lure of the purest pedigree.
The Rainmaker 8" offers a cup faced front with 4 jet holes in the head to help create an amazing bubble trail as this lure trolls through the water.
These lures can be used in most sea conditions and position behind the boat.

9.5" Overall 8" Skirt 120grams Deep Running Heavy Jet Head

TRAILBLAZER 8"

The Trailblazer 8" is a Slant Headed lure that offers more variation in it's action. It swims left, right, down, pops and splashes and also offers 4 jet holes for increased whitewater and bubble trail.
The Trailblazer is ideally run on the leading edge of a wave closer to the boat or on a short rigger position.

BAJA JET 8"

The Baja Jet is a unique lure that offers a bullet shaped head but also offers 4 jet holes for increased bubble trail. These lures are best used at higher speeds and run a bit further back than traditional skirts. This lure is ideal for Barrel Tuna, Marlin and other high speed pelagics.

NEW TRAILBLAZER 8"

The Trailblazer 8" is a Slant Headed lure that offers more variation in it's action. It swims left, right, down, pops and splashes and also offers 4 jet holes for increased whitewater and bubble trail.
The Trailblazer is ideally run on the leading edge of a wave closer to the boat or on a short rigger position.

9.5" Overall 8" Skirt 110grams Slant Head with Jets

NEW BAJA JET 8"

The Baja Jet is a unique lure that offers a bullet shaped head but also offers 4 jet holes for increased bubble trail. These lures are best used at higher speeds and run a bit further back than traditional skirts. This lure is ideal for Barrel Tuna, Marlin and other high speed pelagics.

9.5" Overall 8" Skirt 100grams Bullet Head with Jets

LUCKY 7 JET 7"

2 Jet holes in head
Increase bubble trail

Glow in the Dark
Fish Scale Head

The Lucky 7 Jet is a mid-running cup faced jet that feature 2 jet holes to increase the bubble trail through the water. These lures can be used in most sea conditions and position behind the boat.

8.5" Overall 7" Skirt 90grams Cup Faced Jet Head

SCUPPER 6.5"

Scooped Faced
Slant Head

Kauri Shell Head
3D Eyes

The Scupper 6.5" is a scooped faced slant lure that will swim side to side and pop in calm and rougher water as well. These lures thrive on the outrigger or short corner.

7.75" Overall 6.5" Skirt 60grams Scooped Face Slant Head

NEW ASTRO SHRIMP

Polycarbonate Belly that is UV reactive
In-Built rattles for added attraction
Front tow point - Casting
Rear tow point - Jigging
Assist Hooks with UV reactive Cord & UV reactive Soft feelers

The Astro Shrimp is a realistic and unique Shrimp/Prawn imitation vibe for finesse fishing. The Astro Shrimp incorporates a Polycarbonate Belly with small in built rattles and assist hooks with UV feelers. It also allows for a transparent finish to be achieved in a metal blade and the belly section is UV for added attraction. The Astro Shrimp is effective on Bream, Bass, Estuary Perch, Yellowbelly, Mulloway, Flathead and Redfin.

4cm 10grams Sinking

ASTRO VIBE 45

ASTRO VIBE
(Under UV Light)
Actual Size

The Astro Vibe 45 combines the best of both World's, a metal blade and a rattling vibe.

The Astro Vibe 45 incorporates a Polycarbonate Belly with small in built rattles.

It also allows for a transparent finish to be achieved in a metal blade and the belly section is UV for added attraction.

The Astro Vibe 45 is deadly on Bream, Bass, Estuary Perch, Yellowbelly, Mulloway, Flathead and Redfin.

4.5cm 9.6grams Sinking

ASTRO VIBE 35

NEW

ASTRO VIBE
(Under UV Light)
Actual Size

A new smaller version of the highly popular Astro Vibe 45. Outstanding for more finesse situations.

The Astro Vibe 35 incorporates a Polycarbonate Belly with small in built rattles.

It also allows for a transparent finish to be achieved in a metal blade and the belly section is UV for added attraction.

The Astro Vibe 35 is dynamite on Bream, Bass, Estuary Perch, Flathead and Redfin.

3.5cm 5grams Sinking

CYBER VIBE 65

A larger version of the popular Cyber Vibe. Due to the overwhelming demand for a Snapper-sized Vibe we have released this 6.5cm version that is deadly on Snapper, Barramundi and Murray Cod.

6.5cm 26grams Sinking

CYBER VIBE 35 & 40

Developed by Strike Pro & the Juro Test Team, the Cyber Vibe has 3 tow points and 2 rear hook points, giving the lure up to 6 different actions! This gives the Cyber Vibe more diversity than its competitors. Deadly on Bream, Bass, Perch and Redfin.

Cyber Vibe 40 4.0cm 6.6grams Sinking

Cyber Vibe 35 3.5cm 4.5grams Sinking

CYBER VIBE 30

Actual Size

A miniature finesse version of the highly popular Cyber Vibe. The 30 size is dynamite for fishing flats, cockle beds and pole bases.

It features all the same benefits as it's bigger brothers and is Deadly on Bream, Bass, Estuary Perch and Redfin.

3cm 3.5grams Sinking

CYBER BAIT

The Cyber Bait has a irresistible swaying action and features an **Weight Transfer System** & **loud in built rattles**. It is a super deep diver that is deadly on Barramundi, Mangrove Jacks, Flathead, Salmon, Tailor and large Trout.
8.5cm 9.8grams Floating Dives to approx. 12ft

FLATZ MINNOW

The Flatz Minnow is a larger shallow running minnow that weighs 4.3gm which helps getting distance over shallow flats on spooky fish. It has a slow rolling action and has proven deadly on Bream, Bass and Trout.
6.5cm 4.3grams Floating Dives to approx. 3ft

GALAXIA MINNOW

An extremely popular and effective deep diving baitfish profile lure, complete with **sonic rattle** and with an amazing swimming action. A lure with a proven track record on a wide range of species in Estuary and Freshwater. Suited to both casting and trolling.
6cm 7grams Floating Dives to approx. 12ft

BASS - X

A baitfish profile with deep diving action. Features **in built rattles** and **Weight Transfer System**. Designed for targeting fish holding deeper down. Ideal for Bass, Bream, Estuary Perch, Flathead and Trout.
5.5cm 4grams Floating Dives to approx. 6ft

CRASH SP

The Crash-SP crash dives to approx. 4mts and is outstanding when fishing deep drop offs, over the top of deep weed beds and when fishing cockle beds and pole bases in deep water where you may use a metal vibe lure. The Crash-SP **Suspends in Saltwater**, offers a **Weight Transfer System** for increased casting distance and it is effective on Bream, Estuary Perch, Flathead, Bass & Trout.

4.8cm 5.2grams Suspending Dives to approx. 12ft

SMELTA

A small minnow with a traditional floating action. A tight 'shimmy' action with **in built rattles** and **Owner or Decoy treble hooks**. Ideal for Trout, Bream and Bass.

5cm 2.4grams Floating Dives to approx. 3ft

FUNKY - S

A small profile sinking minnow. It features a tight 'rolling' action and it is a silent lure that is ideal in finesse situations. Can be cast long distances due to it's weight. Ideal for Trout, Bream and Bass.

4.5cm 4.3grams Sinking Dives to approx. 6ft

PYGMY II

The **Winning lure** in the 2006 ABT Bream Grand Final. It features a irresistible **slow swaying rolling action** that fish find very appealing. A very popular lure for Bream and many other species in fresh and saltwater.

4cm 3grams Suspending Dives to approx. 5ft

JOINTED SPRAT

This superb new little Jointed Minnow is certainly going to be a hit with Trout anglers. It has a outstanding swimming action that all Trout species will find appealing and it's small profile and weight design allows for great casting distance and delicate presentations. This lure is dynamite in small streams and rivers.

4cm 2grams Sinking Dives to approx. 4ft

BABY ARCHBACK

A fantastic mini baitfish profile that has a **tight shimmy action**. This little lure is the ideal lure for finesse situations in particular on estuary species like Bream and in freshwater on Trout.

3.5cm 2.2grams Suspending Dives to approx. 3ft

Visit and Follow **JuroOzPro** on You Tube
for all the Videos on the outstanding Strike Pro Lure range.

CYBER CRANK DD

The Cyber Crank DD has proven effective whether fishing flats, structure or weed beds. It dives deeper and **Suspends in Saltwater**, so it sits in the strike zone longer. This lure has been effective on Bream, Bass, Trout, Redfin and Yellowbelly.

3.7cm 5.2grams Suspending Dives to approx. 9ft

BASS BEETLE

A realistic ultra shallow running Beetle imitation. Perfect for when the Christmas Beetles and Cicadas appear. Deadly on Bass, Bream, Estuary Perch, Trout and Jungle Perch.

4cm 5.7grams Floating Dives to approx. 1ft

SPRAT STICK

A **lipless slow sinking stickbait** that has a subtle flutter on the drop. It is ideal for targeting fish that are holding deeper down over weedbeds and in particular around pylons and boat hulls.

4.5cm 3.9grams Sinking Extra Slow Sinking

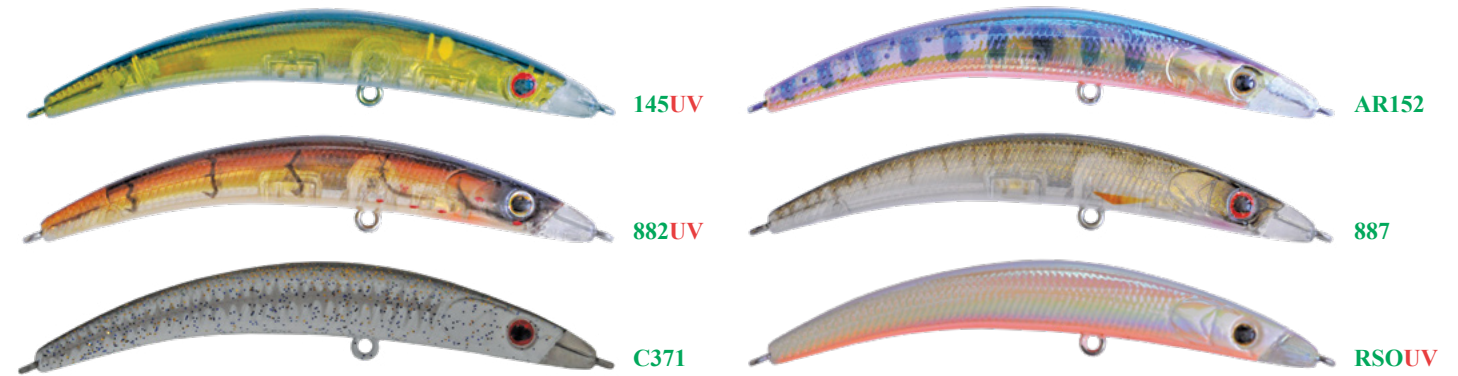

MICRO VIBE 25

A miniature vibe lure that has become a favourite amongst Bream anglers. Perfectly **Weight Balanced** shimmy action on drop and lift and sits head down, tail up on the bottom. Deadly on fish under Moored Boats, Pontoons, Jetties, Pylons and on fish that have shut down or become fickle.

2.5cm 1.9grams Slow Sinking

SLINKY MINNOW 75

A fantastic **surface slide bait** that darts and swims like an injured or fleeing Baitfish or Prawn. The Slinky Minnow floats at rest with its tail underwater at 45° and can be worked with an erratic swimming action, skip like a fleeing Garfish or Prawn or can also be worked like a more traditional diving minnow. They are deadly on Bream, Estuary Perch, Flathead, Mangrove Jacks, Bass & Trout.

7.5cm 4.6grams Surface Floating

RACK POPPER

This little popper has been designed especially for fishing over oyster racks. It features **Fluted holes** above the gills to create extra noise and bubble action. Deadly on Bream, Whiting, Bass & Estuary Perch.

5cm 3.9grams Surface Floating

BOB 'N' SPOON

The Bob 'N' Spoon can be cast retrieved or can be vertically jigged or trolled. It has an erratic swaying action, **in built rattles** and it can be reversed to change the action. It has proven deadly on Trout, Redfin and Bass.

5.5cm 7.3grams Sinking

HUMMER 65

The Hummer is a plastic vibe that is perfectly weight balanced that allows the lure to rest on the bottom perfectly on it's precise weighted chin. It has a fantastic action on the drop and lift. The Hummer also features two top tow points that allows the angler to impart different action on the lure. It is deadly on Bass, Yellowbelly, Mulloway and Mangrove Jack.

6.5cm 13.6grams Sinking

HUMMER 40

The Hummer is a plastic vibe that is perfectly weight balanced that allows the lure to rest on the bottom perfectly on it's precise weighted chin. It has a fantastic action on the drop and lift. The Hummer also features two top tow points that allows the angler to impart different action on the lure. It is deadly on Bream, Bass, Estuary Perch, Flathead and Redfin.

REDFIN JIG

Superb jigging action and finish. Great range of bright, fish attracting colours. Long tail for a slower glide through the water. Red rear tail fin for added attractant. Ideal for Redfin, Bass and other freshwater jigging applications.

5.5cm 7.3grams Sinking

GLIDER

The Glider is a superb miniature swimbait of the purest pedigree. The Glider resembles a Redfin or Bony Bream to a tee and is built tough. This lure Sinks slowly so it will stay in the strike zone.

Each lure is double jointed and has an outstanding lifelike swimming action. Ideal for Bass, Yellowbelly, Redfin, Trout, Estuary Perch & Bream

6.6cm 6.2grams Sinking Dives to approx. 6ft

X-BUSTER *

The X-Buster is an outstanding glidebait of the purest pedigree. The X-Buster resembles a Bony Bream to a tee and is built extremely tough with a **tensile strength of 35kgs**. This lure **Suspends** so it will stay in the strike zone and has a superb swaying action. Each lure features a single joint with a **soft rubber tail**. Deadly on Barramundi, Murray Cod and Mulloway.
17cm 88grams Suspending Dives to approx. 4ft

THE GUPPIE *

**SPARE TAILS ARE AVAILABLE
IN ALL COLOURS
CHG, GOG, MOG, ORG & WHI**

The TrueGlide Guppie has been the gold standard for handmade wood glide baits throughout Europe and the U.S.A. The paint schemes incorporate using paint or glitter on the **INSIDE SHELL** of the bait, in addition to painting the outside shell, layering paint between topcoats for a **3-D effect**. It also prolongs the colour of the bait fish after fish. Strike Pro has even replicated the **3-D eyes** that TrueGlide are famous for. The Guppies body profile allows the lure to produce an amazing body roll and it slides from side to side in outstanding fashion. The Guppie also features an innovative **cork screw** at the tail of the bait allowing the angler to fish with either a **CURLTAIL** or **PADDLETAIL** soft plastic tail, creating the **ULTIMATE SWIM BAIT!** The Guppie is a very effective lure that is deadly on Barramundi, Mulloway, Murray Cod and pelagic species.

13.5cm 120grams Sinking Dives to approx. 4ft

BOBCAT

A dynamite large crankbait for Natives. It features an outstanding swaying action with **Extra-Extra Loud In-Built rattles**. Ideal in murky or dirty water. Deadly on Murray Cod, Barramundi, Mulloway and Snapper
10cm 60grams Floating Dives to approx. 25ft

HUNCHBACK II

A unique deep diving minnow with an head down swaying action. Extra loud **in built rattle**, featuring heavy duty VMC Permasteel trebles. Superb Murray Cod & Yellowbelly also deadly on Barramundi.

8cm 22grams Floating Dives to approx. 20ft

FAT CAT

Superb mid-sized finesse crankbait for Natives. It features an outstanding swaying action with **Extra Loud In-Built rattles**. Ideal in murky or dirty water. Deadly on Yellowbelly, Bass, Murray Cod, Estuary Perch and Silver Perch.

6cm 16grams Floating Dives to approx. 12ft

MINI HUNCH

Actual Size

A smaller version of the popular Hunchback. This lure has been released due to demand by Native and Bass anglers wanting a smaller version. It features **extra large rattles**. It has proven effective on Bass, Yellowbelly, Cod, Redfin and large Trout.

5.5cm 7.5grams Floating Dives to approx. 12ft

CHATTERBAIT 1oz

A popular style lure featuring a Chatterbait blade with a difference. This hybrid blade features metal and plastic with an **Internal Rattle Chamber**, **Silk-cut Silicon round skirts**, **Snap Clip** and **Worm Keepers on the hook** so you can attach a soft plastic. Superior quality and action. Ideal for Murray Cod and Yellowbelly

10cm 1oz Sinking

CHATTERBAIT ½oz

A popular style lure featuring a Chatterbait blade with a difference. This hybrid blade features metal and plastic with an **Internal Rattle Chamber**, **Silk-cut Silicon round skirts**, **Snap Clip** and **Worm Keepers on the hook** so you can attach a soft plastic. Superior quality and action. Ideal for Yellowbelly, Bass & Redfin

ENTICER CRAB

Black Crab (BLK) UV

Blue Swimmer (BS)

Brown Crab (BRN)

(View from Underneath)

Red Claw (RC) UV

Sand Crab (SND) UV

The Strike Pro Enticer Crab is the most realistic soft plastic Crab ever developed with a superb action that just looks like the real thing. It can be rigged on a **Enticer Pro Series Bullet type Jighead Size #4** and used with a lift and drop technique or just slow rolled over the bottom and is very snag resistant. It can also be rigged on a HWS for a slower flutter on the drop approximately ½ the speed of a Standard Jighead. Other rigging options include rigging it with a Cobra style Jighead to stand up in a strike pose or even rigged on a 90 degree Jig Hook to fish across the top of Oyster Racks, Snags and Structure. The Enticer Crabs are a **Neutral Buoyant** Soft Plastic that drops and sinks like a real Crab. Its legs flutter and move just like a natural Crab, and they are **'SCENT INFUSED'** with a secret formula to smell just like the real thing! The Strike Pro Enticer Crabs come packaged with **internal trays** and are 100% perfect out of the packet to use every time.

Carapace 23mm x 20mm 6pcs per pkt Scent Infused

ENTICER FINESSE BUG

The Strike Pro Finesse Bug is a superb Creature Bait that can imitate a Prawn, Bass Yabby (Nipper), Yabby, Crab or Nymph. The Finesse Bugs also feature a smooth body with ribbing added in the body to increase Vibration and will also hold scent if applied, for a longer period of time. The design of the tail section has been done so you don't need to trim the tail for the modern style of Jigheads that most anglers use today. The Feelers give a superb swaying action on the drop and lift and the legs have weight balls added to the ends for added movement and attraction. The Finesse Bugs can be rigged on a **Enticer Pro Series Bullet head Jighead Size #1/0** a HWS for a slower sink rate and more delicate presentation. They also feature a **Rigging Slot System** so you know they are rigged straight and perfect every time.

Tokuryo Line Lab has been established in Taiwan since 1983 and weaving their history for over 30 years.

Tokuryo Line Lab is committed to producing high end fishing lines including PE Lines, Fluorocarbons and Monofilament Lines using the finest Japanese raw materials on the latest most updated machinery and technological breakthroughs in the manufacturing of PE Lines, Fluorocarbons and Monofilament lines from around the World.

MONSTERPRO 8 BRAID

■ 100% Japan UHMWPE raw material

■ special double process technic

■ 8 strands braiding process

■ SI coating surface treatment

■ C/AC twist method

■ environmental care development

Tokuryo Line Lab Monster 8 Braid is made from 100% Japanese UHMWPE raw material and is a superior 8 carrier PE Braid. Monster 8 Braid offers a Special Double Process Technic and construction to increase strength, tighten the weave and increase the abrasion resistance of the braid. It's ultra thin diameters also attribute to casting distance as well as it's special SI-Coated Surface Treatment. This SI-Coated treatment also helps to produce a super smooth surface that creates far less guide friction noise than common braids. Monster 8 Braid is a low stretch, high sensitivity line that offers superb bite detection. Monster 8 Braid is a premium PE line suited to many fishing situations.

NIBBLE TIP EXTREME RODS

The Nibble Tip Extreme Series rods are based on the original Australian Nibble Tip Rods that were designed by Juro many years ago, and are ideal for targeting species such as Trout, Bream and Whiting.

They feature a butt and mid section and a 'Nibble-Tip' section that acts as a bite detector. The butt section is constructed from **High Modulus Graphite** with a **Kevlar Wrap** reinforcement for solid lock-up. The second section is made from 'E'-Glass, and the three tip sections from **Solid Fibreglass**. Each rod features a **Screw-Off Base** that provides storage for spare tips.

There are three different weight /action colour -coded tips supplied with each rod.
The Nibble Tip Extreme Series rods also feature **Hypalon Grips** and **Pac Bay Guides**.

RODS

FLEX - X RODS

The Juro Flex-X Series of rods were developed in Australia by the Juro Oz Pro staff. Juro Flex-X rods are built with the latest technology using "MULTIFLEX" Fibres, giving incredible strength, power and durability. These rods have awesome actions with soft tips and powerful butt sections. They are also extremely sensitive as well as durable. This is a range of rods that is definitely built to last!

The Flex-X Series rods feature **green and gold metallic butt wraps** and are **under and overbound**, with **deluxe stainless steel hooded reel seats**. Other features include shaped **EVA grips**, **Aluminium Oxide guides**, **rubber butt caps** and an **INTEGRATED SOLID GLASS CLEAR TIP**. There is a huge variety of choices available in the Juro Flex-X range of rods, designed to fit the many different fishing conditions around Australia. The diverse range covers everything from Freshwater and Estuary, Boat Fishing, Deepwater Bottom Fishing, right through to Surf Fishing.

RRBO
RUST RESISTANT BEARING

KEEP ROLLING ON!

TiCA Rust Resistant Bearings (RRB) are the next generation in the protection of ball bearings from corrosion and oxidation.

TiCA's new innovative chemical process allows high rust resistant molecules to permeate into all areas of the stainless steel, protecting the bearing from contact with damaging corrosive agents, like saltwater.

Tests show that the TiCA RRB Bearings resist corrosion for at least ten times longer than non treated ball bearings. (See above test results example).

Juro Rod and Reel Combo's have been selected by the Juro Ozpro Tackle Team to offer a quality product at reasonable pricing.
Each combo is balanced and they all come with **high quality line attached**.

These combos have been developed to target bread and butter species that the Australian angler targets and are ideal for holiday makers, anglers that only fish a few times a year, beginners and are great for Children starting out in the fantastic pastime of fishing.

X - WING 90 SQUID*

10X
Material

The Lumica X-Wing Squid is a ultra realistic soft plastic Squid, designed, developed and Made in Japan.

The X-Wing features a secondary slot that allows the angler to insert a Kemihotaru 25mm light inside the body to allow it to glow for added attraction. The X-Wing can be rigged with a lead weighted system with a treble, Carolina or Texas rigged with a Worm Hook or on a weighted Jighead. The X-Wing has a tantalising action that any predatory fish that feed on Squid, Cuttlefish or Octopus find irresistible and appealing.

Lumica Japan was founded in January 1978. The Luminous project was launched and research began into chemiluminescent materials begins. Nippon Chemiluminescence Co., Ltd. was established in 1979 and so began production of the Kemihotaru light emitter for fishing floats. The World's 1st Chemical Light for fishing. Over the proceeding years they began to open numerous branches throughout Japan and then progressively opened branches Internationally as sales continued to soar. In 2001 the trading name was changed to Lumica Co., Ltd.

and they began to develop other products outside Chemical lights as technology began to advance.

Their range of Deepwater Droplights are the most cutting edge on the planet and offer a huge variety of styles and have all depths covered from 300 to 1200mt depths. As technology continued to advance they also saw an opportunity to develop a range of L.E.D. rod lights for fishing rods for the angler that wanted a more long term option.

Lumica has been producing the World's Best Chemical lights for over 40 years.

"Simply insist on the Original and still the Best!"

The original Australian designed and developed lure that has been a favourite amongst Aussie anglers for many years. A versatile lure in a large range of colours and sizes that can be used for spinning, jigging or trolling for many fish species.

Available in sizes 15, 25, 35, 50, 70 & 90 grams

The Bushranger Spinnerbaits are suitable for Murray Cod, Yellowbelly, Bass & Redfin.

1/2oz

Daiichi Hooks of Japan were the first hook makers in the world to produce a coloured chemically sharpened hook, thanks largely to the input of the Team at Juro OzPro Tackle Australia. The Juro Team observed that local anglers targeting species such as Whiting often used red tubing or beads as an attractant, and approached Daiichi with a request to build that attraction into the hook itself.

Daiichi responded by developing a coloured coating that was not only durable, but also had no adverse effects on the sharpness of the hook point like many of the thicker painted coatings can.

This innovative process was something that would change the manufacturing of hooks worldwide forever, as every other company soon realised the effectiveness of coloured chemically sharpened hooks and rushed to bring out copies.

In spite of all of this added competition, Daiichi still manufacture the finest range of ultra-sharp chemically etched hook points in the World. Daiichi Hooks are still The World's Finest Quality Hi-Carbon Chemically Sharpened Hooks.

Daiichi are the 'Premium Quality Japanese Boutique Hook Company'. 100% Made in Japan.
